HEADPHONE AMPLIFIER DSP

HEADPHONE AMPLIFIER DSP

AVAILABLE IN TWO VERSIONS:

TABLE MOUNT

FLUSH MOUNT

GAIN CONTROL

3 BAND EQ

OUTPUT LIMITER

HIGH POWER CLASS AB AMPLIFIER

SUPERB S/N RATIO

RJ45 LINK

3.5 AND 6.35MM JACK

The AeroAudio HP AMP DSP FM is a superb well designed studio quality headphone amplifier made for Jocks and producers that hides away and just does the job you need it for. A DSP controlled class AB headphone amplifier with gain control, three-band EQ and output limiter.

With a double output for both 3.5 and 6.3mm jack's makes the annoying 'where did I put it' adapters obsolete, just simply connecting all types of studio headphones.

Connecting it has never been so easy. The RJ45 connection is based on international standard cat5 audio pin-out that you can directly link to a node or standard adapter cable. Need more? Just link an other Amp on the RJ45 link output with standard cat cable and you're done. Not only audio but power is provided to the next Amp as well.

Tablemount:

The rock solid casing hides away under your desk with a special design so your knees are safe from painfully bumping it. A small bright shining LED let's you find the Amp instantly.

manual

Flushmount

The rock solid casing hides away in your desk.
