DWARF CONNECTION

Director's Monitor Cage

DC.GO MINI
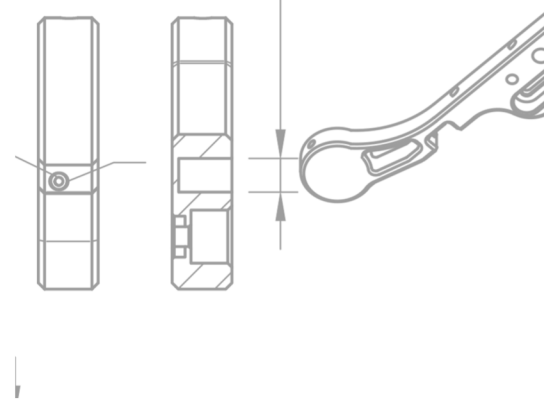

Designed in Austria

for **5"** AND COMPACT **7"** Monitors

Cage only,
V-Mount Ready
or as RX Bundle
does not include monitor

The DC.GO Mini from DwarfConnection is a lightweight, compact and universal cage for 5" and compact 7" monitors.

UNIVERSAL

DWARF CONNECTION
Just works.

CAGE
ONLY

In order to meet as many requirements as possible and thus ensure maximum compatibility, the cage comes with a "monitor riser", which makes also bottom sockets accessible.

V-MOUNT
READY

If you prefer to operate your monitor with V-mount batteries, it is best to use the DC.VOLT battery plate, which can be attached directly to the cage using the DC.VOLT connector.

The DC.GO Mini can be ordered as „V-Mount ready" option including battery plate, connector and cable.

XS3 - RX
BUNDLE

The DC.GO Mini is most compact when operated with the DwarfConnection X.LINK-XS3 and NPF battery. In this case, the receiver can simply be installed in a sandwich with the monitor and battery.

Both products can be ordered together as a "DC.GO Mini RX Bundle"

—Just works.

LEATHER GRIPS
AND MORE?

As with the 7" model, the grips are made of genuine leather and
have been selected so that they can be easily replaced:
They are commercially available short bicycle grips for grip
shifting.

Selected models will also be available to order directly from us in
the future, please send us your request.

Various colors and materials available to order soon
